

At almost 18% breed share the second most frequent sheep breed in Germany. Fast growing meat sheep with marked muscling, i.e. deep, wide, prominent breast, deep, broad body with a long back that is broad, firm and well-muscled. A wide and long pelvis with full muscled outer and inner legs that reach far down, good carcass quality.

Good early maturity and fertility at early, very long lasting mating season. Mating of hogget is already possible with the first year.

Very adaptable and resistant in all forms of management, excellent grazing, walking and pen holding ability, also very suitable for paddock-holding. Head and feet are black and not too strongly covered with wool. The white wool is a crossbred wool with an even C/CD assortment (33-35 micron).

	<b>Weight (kg)</b>	<b>Vleece- Weight (kg)</b>	<b>Fiber diameter (Microns)</b>	<b>Lambing percentage (%)</b>
<b>Mature ram</b>	120-160	5,0-7,0	32 - 36	
<b>Yearling ram</b>	90-120	5,0-6,0		
<b>Lamb (male, 6 month)</b>	60-80			
<b>Mature ewes</b>	70-100	4,0-5,0	150-200	150-200
<b>Lamb (female, 6 month)</b>	50-60			

Daily gain: 400 - 500 gram,  
slaughter yield: 48 - 50 %
